Thanks, Miranda (and thanks to Chris as well!). If the state does not provide, we can take a look at these and try to line things up with the final TMDL tables in the submittal you provided.

Ok, I hope so!

I got some bacteria spreadsheets from Chris in the meantime – the emails go with the numbered attachments. He let me know that these were draft calculations, and he is not sure what Ecology ended up choosing to use for their final calculations, particularly with flow. Hopefully they will be able to share that with us soon – I heard back from Leanne and she is looking into our request.

I've also just gotten the contact info for someone with the Tribe, and have emailed them to request data.

Hi Miranda,  
Not a peep from the county...hopefully we receive some info over the next week or so. Thanks for sending out the requests!  
Thanks, Amy

Thanks for the summary! The notes look good to me.

I have sent out requests for the three items under my name, and have not heard back yet. I will follow up with some phone calls if I don't hear back near the end of this week. Did you hear back from Thurston County yet?

**Subject:** Deschutes - summary of 10/4 call

Hi Miranda and Jayne,  
Attached is a brief summary of our call last week on the additional data and information for the Deschutes TMDLs. The action items are also listed below. Please let me know if you have any suggested edits or comments on the summary.

#### Action Items

- Tetra Tech will prepare a summary of the call and distribute it to the team for comments.
- Tetra Tech will request data in a more usable format from Thurston County (EPA will be copied on the request).
- Tetra Tech will pursue permittee data from Ecology's Paris database.
- Miranda will ask the watershed group organizer to send a data request to the team. Goal is to obtain additional MS4 data.
- Miranda will request the additional data and information from Ecology; Tetra Tech will first review the data request bullets prepared by Miranda.
- Miranda will follow up with Leanne about a tribal contact.
- Amy will follow up the week of October 15 about the timing of the technical approach, which is dependent on additional data.

Thanks, Amy
